DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 7, 12, 13, 20, and 21 are rejected under 35 U.S.C. 102(b) as being anticipated by Gur *et al.* Gur *et al.* shows all of the features of the instant invention including a method, apparatus, or computer program where a CAD algorithm is run against a CT scan or DRRs from a CT scan (abstract, column 3 lines 24-40, column 8 lines 45-68, column 9 lines 37 and 38, and claims 18-20).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 8, 9, 16, 25, and 26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gur *et al.* Gur *et al.* shows all of the features of the instant invention as shown above, except that Gur *et al.* is silent of the displaying of CAD results mapped onto, registered with, or simultaneously with the CT or DRR images. It is well known to have anomalies marked on the image of the item containing the anomaly, as evidenced by Kaufhold *et al.* US 2003/0194115 A1 (figures 3 and 5) and Wang US 6,266,435 B1 (abstract and figure 1) which shows CAD found

anomalies in a radiograph shown either beside or superimposed on the radiograph. It would have been obvious to one of ordinary skill in the art at the time of the instant invention to map, register, or simultaneously display the CAD results and the CT or DRR images motivated by the desire to directly point out the suspected anomalies to the radiologist.

Allowable Subject Matter

5. Claims 1-6 and 27-30 are allowed.
6. Claims 10, 11, 14, 15, 17-19, 22, and 23 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
